This indicator is based on simulated historical data which may not be a reliable indication of the future risk profile of such Class. The categorisation of the Class in the scale is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

#### Why this category?

The fund is in this category because its fixed income assets will be basically in investment grade fixed income instruments

with an appropriate diversification and with a duration under 3 years.

The Class is also subject to:

**Credit risk:** This is the risk that the issuer of fixed income securities cannot pay the principal or interest.

**Liquidity risk:** This is the risk that some securities may not be sold at normal price and timely conditions on a market.

**Risk of financial derivative instruments:** The use of these instruments may cause high volatility of the net asset value of the Class. These instruments may create a leverage effect and may also be dealt over-the-counter (i. e. not through a

clearing chamber). Risk hedging by using these instruments may not be perfect.
